

## Cybersecurity State of the Union

**“Your business has either been hacked or will be hacked – that’s a fact.”**

*Gen. Wesley Clark (Ret.)  
Former NATO Supreme Allied  
Commander and SPARQ Advisor*

## Our Pedigree

- Founded in 1997; privately held, veteran-owned
- Protecting over \$50 Billion of US Government mission critical assets and data
- Delivering highly classified, mission-critical defense, and homeland security solutions and services
- DoD, NSA trusted integrator

## LEARN HOW CLASSIFIED-GRADE CYBERSECURITY FOR COMMERCIAL CAN PROVIDE 100% CYBER RESILIENCE AND ENSURE COVID-19 CRISIS RELATED CONTINUITY OF OPERATIONS!

COVID-19 changed the way the world works overnight, forcing companies to extend their security perimeters to every employee’s home, while maintaining continuity of business operations. Unfortunately, cybercriminals, including nation-state actors, are actively and aggressively taking advantage of the chaos and increased cyber threat vectors, exposing companies to massive financial, operational, high-value assets, and supply chain risks.

As a critical infrastructure provider, you are responsible to achieve the impossible, and ensure that all remote communications are 100% cybersecure, since DATA is now arguably your most critical asset across both IT & OT domains. Your Businesses needs 4 critical cybersecurity elements without failure: i) hyper-secure remote connectivity, ii) a secure supply chain, iii) a Cybersecure Continuity of Operations Plan (“C-COOP”), and iv) a cyber risk assurance plan (aligning cyber technology + governance + insurance).

This webinar provides you with ‘know-how’ on how to cost-effectively implement hyper-secure remote connectivity (far superior to traditional VPNs) as part of a C-COOP, and how your company can benefit from applying secure, “Made in USA” supply chains and classified-grade cybersecurity techniques and technologies.

## SPEAKERS

**Mr. Mike Danjczek, CTO**  
Over 15 years of experience in R&D, product development, complex systems integration in defense and commercial industries

**Mr. Anthony J. Russo, CISO**  
**CIPP/US, CISA**  
Over 25 years of experience in emergent and mature IT and cybersecurity practices

**Mr. Jon Rappaport, CBO**  
Over 30 years of experience in building new global markets as a technology entrepreneur and transformational executive
